# THREADING

Threading is a quick, chemical-free, hygienic and, on the whole, low pain method of hair removal. In threading, a thin, twisted cotton thread specially designed for the purpose is rolled over the area to remove unwanted hair. Areas such as eyebrows, upper lip, chin and sides of face. This provides more precise control when shaping eyebrows than other methods and is gentle on the skin.

## Thread Vein Treatment 30mins £49

Electrolysis for thread vein removal is a specialised treatment using an electrical current and just the very tip of the finest, smallest probe possible, (about the size of an eyelash), to remove unwanted skin blemishes with no mark left on the skin.

## Milia Removal 30mins £49

Electrolysis Milia removal is by far the most effective, gentle and safest way to remove milia using the electrolysis current. Milia are hard, white keratin-filled cysts that form just under the skin. Commonly found around the eye area, nose and cheeks.
